

Mr Light

Mr. Light Classic

MR. LIGHT Classic is a compact and efficient signalling device, ideal for radio studios, recording suites, TV and radio control rooms, and many more. An internal high intensity LED array provides optimal visibility in any environmental light condition.

As an option, MR. LIGHT is also available in the “double sided” version, featuring two illuminated faces. Warning texts (such as “On-Air”, “Silence”, etc.) are printed on transparent films and can be chosen from the standard range or customized for your application.

The display can be constantly illuminated or blinking and easily modified by replacing the film. With the included bracket, MR. LIGHT classic is easily mounted on the wall on to the ceiling.

An optional, additional bracket is available to allow an easy “flag” mounting.

For easier installation and operation, MR. LIGHT Classic just requires a simple DC supply of between 12

and 15 Volts.

The optional power supply can provide enough power to operate a maximum of three units, with any combination of constant or blinking operation.

It also allows for easy control via TTL or clean contacts on photocouplers (separate for each lamp) and makes MR. LIGHT Classic suitable for any audio console or control device.

Thanks to the separate installation of the power supply, you will avoid any long AC main cable runs across the walls or close to the studio's ceiling. Alternatively to the dedicated power supply, MR. LIGHT Classic lamps may also be fed by any regular stabilized DC voltage.

Mr. Light RGB

MR. LIGHT RGB is the new multipurpose signal lamp designed for Radio, TV, on air, production and recording studios. The lamp is also ideal for any other environment where a signalling light is required such as audio booths, meeting rooms and offices.

It's highly configurable to match customers' needs: colour, wording, graphics, brightness and operating mode.

MR. LIGHT RGB has been designed to be easily installed in any environment and condition.

MR. LIGHT RGB is made of high quality components and material that guarantee modern design and no need for maintenance.

Main Features

Mr. Light Classic

- ☑ Lifetime led operation, in both constant and blinking modes
- ☑ Easy to install and control

Mr. Light RGB

- ☑ Multi-coloured RGB LEDs
- ☑ Operating mode: blink, blink 2-colours, pulse always on.

☑ Customizable display text, single or double-sided options custom configuration

☑ Supplied with mounting kit: wall and ceiling

☑ Just 1 cable

☑ GPIOs for remote control.

☑ Easy setting for colour and switching mode

☑ High availability and low power consumption

☑ 12V DC power supply included

☑ Customizable wording with Text and graphics (logos, icons, symbols and ideograms)
